

POND ²
A N
ALMANACK
for the year of our
LORD GOD
1661.

Being the first after Leap-year,
and from the Worlds Creation
according to the best ac-
count 5664.

Amplified, with many good things, both for plea-
sure and profit: And fitted for the meridian of
Saffron-walden in Essex, where the pole is ele-
vated 52 degrees and six minutes above the
Horizon.

Whereunto are added the several Fairs held
in *England* each moneth this year.

C A M B R I D G E :
Printed by *John Field*, Printer to the
Univerſitie. 1661.

Of the Calends, Nones, and Ides, being
the last Column of this Almanack, in
the Blank page thereof.

THe *Calends* are the first day of every moneth, so called *Calendæ, quasi Colendæ*, Days of worship, because the old *Romanes* used to sanctifie the first day of every moneth, in the honour of *Juno*; Now the last day of every moneth is called *Pridie Calendarum*, or *Calendas*, the day before the *Calends* of the next moneth; as the last of *February* is *Pridie Calendarum Martii*, the day before the *Calends* of *March*. Although the *Calends* be the first day of the moneth, yet they begin the next day after the *Ides* the moneth before, as the 14 of *February* begins the 15 *Calends* of *March*, and so on as the figures in the Column shew thee.

The *Nones* be certain days in every moneth: In *March*, *May*, *July* and *October*, they last from the 2, 3, 4, 5, 6, and 7 days; the 6 whereof is *Pridie Nonarum*, and the seventh *Nonæ*, but in all the other moneths the *Nones* contain but the 2, 3, 4, and 5 days; the fourth whereof is *Pridie Nonarum*; the 5 and last *Nonæ*, as before. They are called *Nonæ* from the word *Non*, not, (as some think) because during this time the *Romanes* sanctified no day to their Gods.

The *Ides* follow next after the *Nones*, and in these moneths *March*, *May*, *July* and *October*, they are on the 15 day, but in all other moneths they are always on the 13 day.

And note, the	Golden Number	this
year is		9
The Cycle of the Sun		18
The Epact		9
The Dominical Letter		F

The

The Anatomie of Mans bodie as the partes thereof

are governed by the twelve Signes.

✓ Aries, Head and face.

♉ Taurus,
Neck and
Throat.

♋ Cancer,
Breast and
Stomack.

♍ Virgo,
Bowels &
Belly.

♏ Scorpio,
Secret
Members.

♐ Capric.
Knees.

♊ Gemini,

Shoulders.

♌ Leo,
Heart and
back.

♎ Libra,
Kings &
Lords.

♐ Sagittar.
Thighs.

♒ Aquar.
Leggs.

♓ Pisces, the feet.

Brief rules of Husbandry.

Plant and graft the Moon increasing, in *Taurus*
or *Aquarius*, the wind not Easternly.

Fell timber from Midsummer till Christmas, the
Moon increasing.

Fel coppice & fewel, the Moon in the first quarter.
Cut your Vines in February or March.

Geld cattell the Moon in *Aries*, *Sagittarius*, or
Capricorn.

Remove trees, the Moon at the last quarter in
November.

Shear sheep, and cut hair to grow, ☾ increasing.

To keep thy hair safely from falling untimely,
Hot scalding baths deny, bane waxton company,
Abstain from Venery, purge choler wixily,
Let thee bloud needfully, surset not wixlingly.

January hath xxxi days.

Full moon 5 day, 29 min. past 9 before noon.
 Last quarter 13 day, 55 min. past 2 after noon.
 New moon the 20 day, 33 min. past 2 after noon.
 First quarter the 27 day about 7 in the morning.

The moneth begins well, hath some wind on the 3 day, and a few cool drops on the 4. Nor is the weather but good enough till half the moneth be ended: but then expect wind, thunder and many storms; chiefly the 16, 18, 19, 20, 21 and 22 days. From thence good again till after the 23 day; from whence heat, hail, or other storms are quickly seen, and perhaps more thunder. But upon the 29 day something cooler.

The first day fair. the 2 rain or thunder. the 4 day heat, and so on for many days, with thunder now and then. And indeed we are like to have very hot and dry weather most part of this moneth: chiefly after the 8 day, and again after the 19 day. And about *Mary Magdalen* and after, thunder and lightning very often by reason of heat: but on the two last days more cool cloudy and dark air.

Of the Eclipses this year.

There be four Eclipses this year, but no more then two of them can be seen of us in our Hemisphere.

The first whereof is an Eclipse of the Sun. It will be on Wednesday the twentieth day of March in the forenoon. It beginneth at 33 minutes past 8 in the morning: is at its greatest darkness by 36 minutes past nine; at which time seven parts and ten minutes of the Suns body will be darkened; and by forty two minutes past ten it will be ended. This Eclipse is in the tenth degree and 14 minutes of Aries, and continueth from first to last, just two hours and nine minutes.

The other (being an Eclipse of the Moon) will be on Saturday the 28 day of September. The beginning of it is at 41 minutes past one in the morning: the greatest darkness will be at three, at which time will toward seven parts or digits of the Moons body will be darkened; and by fifteen minutes past four it will be fully ended. This Eclipse continueth two hours and thirty four minutes, and is in the fifteenth degree and eight minutes of Aries: so that both these Eclipses are in one and the same sign, and not fully five degrees distant each from other.

And as for the other two, because they cannot be seen of us in England, I forbear to make any farther mention of them.

P O N D

MDCLXI.

The latter part of this
ALMANACK
for the year of our
LORD GOD
1661.

Being the first after Bissextile or
Leap-year, and from the Conquest of
William Duke of Normandy
595 years.

*Frigidus & siccus Satur. Jup. astat uetus.
Mars & Sol feci fervent: sed Luna Venúsque
Hæc frigescent: medius Cyenias esto.*

*Inter spem, curamque, timores inter, & iras,
Omne crede diem tibi diluxisse supremum.*

Of the four quarters of the year.

The *Vernal* quarter derives his name à *virendo*, from flourishing; *quia tunc omnia virent & florent*, because all things then flourish: this being the first Quarter in the year, as appeareth by the old distich,

*Omnia cum vireant, tunc est nova temporis aetas:
Sic annus per Ver incipiendus erit.*

This quarter beginneth *March* the 10, the Sun then entring into the first degree of *Aries*, producing the first *Equinox*; and continueth till *June* the 11: in which time Sun runneth through *Aries*, *Taurus*, and *Gemini*. It is a Quarter naturally (though accidentally it sometime prove otherwise) hot and moist, resembled to the *Oriental* region of the world, the South-wind, the *Sir*, the *Sanguine* complexion, and to *Infancy*. The ordinary diseases (according to common course) of this quarter be *Leproses*, *Red spots*, *Fevers of blood*, *small pox*, with other infirmities proceeding of blood.

The *Æstival* quarter is next. It beginneth *June* the 11, the Sun then entring into the first degree of *Cancer*, and continueth till *September* the 13: during which time the Sun runneth through these three celestial constellations, viz. *Cancer*, *Leo*, and *Virgo*. It deriveth the name *ab aestu*, from the exceeding heat which useth to be now, as also the English word *Summer* hath: for it is called *summer*, *quasi summe mehr*, as the *German* speak; that is, *plus solis*, because we have more of the sun then, then at any other time.

This quarter is naturally hot and dry, resembled to the *Oriental* region of the world, to the *S-E*, to the *Choler*, to *Youth*. The sicknesses agreeing herunto be
Stomachs

Pend 1661.

Stomach-aking, Spothumes, pestilent Feavers, Pandise, with other infirmities proceeding of choler. According to the Arabians this is the first quarter of the year, who hold that the Sun was made in Leo: and their reason is, because the Lion is the house of the Sun. Mercator in his Chronologie is of the same minde, but backs his opinion very weakly.

The Autumnal quarter beginneth September the 13, the Sun entering into the first degree of Libra, producing the second Equinox; and continueth till the 11 of December: in which time the Sun runneth through Libra, Scorpio, and Sagittarius.

This quarter the Jews own for the first quarter of the year: and their reason is, *quia tempus est fructuosum*, because it is a time of fruit; according to that in the Scripture, *Et protulit terra herbam viuentem facientem fructum juxta genus suum*, And the earth brought forth the green herb yielding fruit according to its kind. It is a quarter naturally cold and dry, resembled to the Septentrional-region of the World, to the North wind, to the Earth, to Melancholy, and to the declining age of man. The diseases properly incident to it be pains in the back, darkness of sight, retention of urine, also the canker, fistuloes, emroids, with other infirmities proceeding of melancholy.

The Hyemal or Winter quarter (being naturally cold and moist, resembled to the Occidental-region of the world, to the West, to Water, to Aegre, and to old age) beginneth December the 11, the Sun then entering into the first degree of Capricorn; and continueth till March the 10: in which time the Sun runneth through these three celestial signs, viz Capricorn, Aquarius, and Pisces.

This quarter, though of us accounted the last, yet by Numa Pompilius it was accounted the first, and that
for

Pond 1661.

for this reason; quia tunc Sol ad nos ascendere incipit; because the Sun then begins to ascend the Ecliptick: Whence the Poet, Ovid by name,

Bruma novi prima est vterisque novissima solis:

Principium capiunt Phœbus & Annus idem.

The diseases incident to this quarter be commonly pushes in the face, tooth-ach, scabs, fluxes of blood by the inferiour parts, palsies, gouts, with other diseases proceeding of flegme.

A medicine for the Gout.

The roots of Comfry taken fresh, beaten small, and spread upon leather, and laid upon any place troubled with the Gout, doth presently give ease of the pains, as by often experience hath been found. It is good also for pains in the joynts, Gangrens, and is very profitable for running and moist ulcers.

A medicine for a Boyl.

The herb Balm is an herb of *Jupiter*, and under *Cancer*. This herb, if it be bruised and boyled in a little wine and oyl, and laid warm on a Boyl, it will ripen and break it.

A medicine to cure Numbness, &c.

Take an oyl made of the Berries of the Bay-tree, and therewith anoint the place, for it is very comfortable in all cold griefs of the joynts, Nerves, Arteries, Stomach, Belly or Womb; and helpeth Palsies, Cramps, Convulsions, Aches, Trembling and Numbness in any part; weariness also and pains that come by sore travelling.

C

A

Pond. 1661.

A medicine for womens breasts.

Bean flower made into a Pultis is good to as-
swage Inflammations rising upon wounds, and to help
the swellings of womens breasts caused by the curd-
ling of their Milk, repressing their Milk, &c.

Against Chilblains or Kibes.

Take the common white Beet, & boyl the leaves
thereof in water: then take and lay them upon
Kibes or Chilblains, and it will help them.

Against the Tooth-ach.

The decoction of Wood Betony made in Wine,
and gargled in the mouth, easeth the Tooth-ach.
This herb is appropriated to the Planet *Jupiter*, and
the sign *Aries*. A decoction of Hysop in vinegar
will do the like: it must be sodden to halfe.

Good against the Itch.

The leaves of the Bramble or Black-berry-bush
boyled in Lie, and the Head washed therewith,
healeth the Itch and the running sores thereof. but
w. li die the Hair into a black, or at the least make
it blacker then it was before.

Good against Deafness.

The juice of either the Winter or Summer-savo-
ry heated with a little of of Roses, and dropped in-
to the ears, easeth them of the Noise and Singing
in them, and of Deafness also.

Good

Pond 1661.

Good against Worms.

The seed of Purslane bruised and boyled in wine, and given to children, expelleth the Worms.

Good for the Liver and Spleen.

The decoction either of the Leaves or Bark of the Maple-tree, is very good to strengthen the Liver: and is also good to open obstructions both of the Liver and Spleen, and easeth pains of the sides proceeding from thence.

For a sore Mouth or Throat.

The flowers of Mallows boyled in oyl or water, whereunto a little Honey and Allum is put, is an excellent Gargle to wash, cleanse, and heal any sore Mouth, or Throat, in a short space.

For a broken-winded Horse.

The herb Lungwort boyled in Beer is an excellent remedy for broken-winded Horses: which you may give them as you give any other Drink.

For a Pin and web in the Eye.

The fine powder of Liquoris blown through a Quil into the eyes that have a Pin and Web (as they call it) or Rewmatick Distillations into them, doth cleanse and help them.

For the Ague.

The Decoction of the leaves and seeds of Saint Johns-wort being drunk somewhat warm before

the fits of Agues, whether they be Tertians or Quartans, doth alter the fits, and by often using doth take them quite away.

The vertues of Clove-Gilli-flowers as they be set down by Mr Culpeper in his English Physician.

They are gallant fine temperate flowers, of the nature and under the dominion of *Jupiter*; yea, so temperate, that no excess, neither in heat, cold, driness, nor moisture can be perceived in them. They are great strengtheners both of the Brain & Heart, and will therefore serve either for Cordials or Cephalicks as your occasion is. There is both a Syrup and a Conserve made of them: to take now & then a little of either, strengthens nature much, to such as are in Consumptions. They are also good in hot Pestilential Fevers, and expell poyson.

Sed contra vim mortis non est medicamen in hortis. Statutum enim est omnibus semel mori, Heb. 9.27.

Other Physical Observations.

Let blood at no time without great cause; for it bringeth weakness and many infirmities. If ye do, see it be after good digestion and fasting, in a fair temperate day, if it may be. Beware before of all manner of exercises, as bathing, watching, carnal copulation, &c. After, use fine meats of light digestion, abstaining from all aforesaid until the 4 day.

These

Pond 1661.

These Signes are ill for bloud-letting, the Moon being in them, viz. *Taurus*, *Gemini*, *Leo*, *Virgo*, and *Capricorn*, with the last half of *Libra* and *Scorpio*: the rest are all good, if the Moon bear no dominion in that member which ye cut.

Furthermore, in letting of bloud you must know what persons are fit to bleed, and what not: and if they be fit, how it is with the patient inwardly, for his complexion and age; outwardly, for the time of the year, time of the moneth, day, and diet.

For Complexion.

For the Flegmatick, let the Moon be in *Aries* or *Sagittarius*: for the Melancholy, in *Libra* or *Aquarius*: for the Cholerick in *Cancer* or *Pisces*: and for the Sanguine, in any of the afore said, *Luna signum membro dominans peragrans*.

For age let bloud.

In youth, from the change to the first quarter.
In middle age, from the first quarter to the full.
In elder age, from the full to the last quarter.
In old age, from the last quarter to the change.

For the time of the year.

The *Spring* is best, *Autumn* indifferent, the rest of the year bad, and to be used but upon necessitie.

In Spring and Summer let the right arm bloud,

The Fall and Winter for the left more good.

Pond 1661.

For the time of the moneth.

Let not blood three days before nor three days after the change: nor the day before, nor the day after the conjunction of *Luna* and *Saturn*, or of *Luna* and *Mars*; nor when *Venus* and *Luna* be in conjunction, if *Venus* at the same time be combust. The best and fittest time is, when the *Moon* is affected with *Jupiter* or *Venus* incombust; or in Sextile or Trine with *Sol* or *Mars*.

The time of the day.

The morning after Sun-rising fasting is the best: or in the after noon towards evening after perfect digestion, if the air be temperate, and the wind not south.

Diet after bleeding.

*Sleep not presently, Stir not violently,
Feed but warily Use no Venerie
Soon after Phlebotomie.*

But notwithstanding these rules let it be further observed, that for the *Pestilence*, the *Phrensie*, the *Plurisie*, the *Squinacy*, the *Apeplexy*, a continual *Headach* growing of choler or blood, a hot burning fever, or any other extreme pain, we are not to tarry for a chosen time, but must presently with all convenient speed seek a remedie: but then blood is not to be let out in so great a quantity as if a chosen time were had.

Pond 1661:

And as for purging, take these rules.

The ☾ in ♈ in * or △ with	♀	Purge choler ♀ not combust	} with Ele&u- aries.
		☉ Purge phlegme	
		♊ Purge melancholy	
The ☾ in ♈ in * or △ with	♀	Purge choler ♀ not combust	} with Poti- ons.
		☉ Purge phlegme	
		♊ Purge melancholy	
The ☾ in ♈ in * or △ with	♀	Purge choler ♀ not combust	} with Pills.
		☉ Purge phlegme	
		♊ Purge melancholy	
The ☾ in ♈ or ♈ in * or △ with	♀	Purge choler ♀ not combust	} with any kinde of medicine
		☉ Purge phlegme	
		♊ Purge melancholy	

But see that the Moon be not in any of the signes that chew the cud: as *Aries, Taurus, Capricorn*: for then the medicine will stay but little with the Patient, causing him to vomit; unless you intend to purge by vomiting, for then indeed these signes are good. Also, in purging melancholy, let not *Saturn* have the dominion; nor *Jupiter*, when you purge the sanguine; nor *Mars*, when you purge the chole-
rick.

Good to	{	Prepare humours	{ the Moon in	Gemini, Libra, or Aquarius.
		Vomit		Aries, Taurus, or Capricorn.
		Purge by neezing		Cancer, Leo, or Virgo.
		Take clysters		Aries, Libra, or Scorpio.
		Take gargarismes		Cancer, or Aries.
		Stop rheums and flux		Taurus, Virgo, or Capricorn.
	{	Bath for cold diseases	{	Aries, Leo, or Sagittarius.
		Bath for hot diseases		Cancer, Scorpio, or Pisces.

Medicina à Medico, medela ab Altissimo.

How the moveable feasts are found readily.

SEEK the change of the moon in *February* for that year ye desire the moveable feasts. Then note what day it falleth on the next Tuesday is Shrovetuesday; but if the change be on Tuesday the next Tuesday ensuing is it. The next Sunday is the first Sunday in Lent. Six Sundays after is Easter-day. Add 35 days or 5 weeks to Easter-day, and ye have Rogation-sunday. To that add 4 days, so ye have Ascension day: then have ye 10 days to Whitsunday. And 7 days after is Trinitie-sunday.

Of the Week.

A Week hath divers names. In *Latine* it is called *Septimana*, à *septem* & *man*, as it were having *septem matutina tempora*, seven mornings. It is also called *Hebdomas*, ab *ἑπτὰ*, which is *septem*, as containing seven days. It is also called *Sabbatum* by the *Jews*, as appeareth by that sentence in Scripture, *Jejuno bis sabbato*, &c. where the word *Sabbatum* is *equivocum ad totam septimanam*. You may observe the *Jews* sabbath day was Saturday but the *Christians* observe Sunday, which they call *dies Dominica*, The Lords day; because on that day *Christ Jesus*, our Lord and Saviour, arose from the dead.

How to finde the age of the Moon.

ADD to the Epact the number of moneths from the beginning of *March*, together with the moneth wherein you seek, and also the number of days past of that moneth wherein you seek, and such addition will shew you the age of the moon, if the sum of addition be less then 30; but if it exceed 30, then subtract 30, and the remainder shall be the age of the moon, if so be the moneth wherein you seek hath 31 days: but if it hath less then 31, subtract but 29, and the remainder shall be the age.

A

A rule to finde the Moons distance from the Sun,
by which is gathered at all times the Signe and
degree where the Moon is.

Multiply the age of the Moon by 4, divide by 10, the
quotient sheweth the signes that the Moon differeth
from the Sun; the remainder augmented by 3, bringeth de-
grees to be added: Ye must put these signes and degrees to
the place of the Sun. The product, I mean the encrease or
end of all these signes and degrees, in order counted from the
Sun, declares the place of the Moon in the Zodiack.

**The Characters of the 12 Signes, 7 Planets,
Dragons-head and Tayl.**

♈ Aries. ♉ Taurus. ♊ Gemini. ♋ Cancer. ♌ Leo:
♍ Virgo. ♎ Libra. ♏ Scorpio. ♐ Sagittarius. ♑ Capri-
cornus. ♒ Aquarius. ♓ Pisces. ♄ Saturn. ♃ Jupiter. ♀
Mars. ☉ Sol. ♀ Venus. ☿ Mercurie. ☾ Luna. ♁ The
Dragon-head. ♃ The tayl.

The Aspects both old and new.

- ♌ A conjunction, when Planets are in one signe and degree.
- SS. A semisextile, when Planets are distant one signe.
- * A sextile, when any are distant 2 signes.
- Q. A quintile, when distant 2 signes and 12 degrees.
- A quartile, when they are 3 signes distant.
- Td. A tredicile, when they be distant 3 signes & 18 degrees.
- △ A trine. when distant 4 signes.
- Bq. A biquintile, when distant 4 signes and 24 degrees.
- Vc. A quincunx, when they are asunder 5 signes.
- ♌ An opposition, when the distance is just 6 signes.

Pond 1661.

Of many and sundry Fairs in England, as they have heretofore been set forth by others, and are now continued for the common good.
